SECTION 1

PALPEBRAL TUMORS - Olivier Galatoire - Mathieu Zmuda

1. Epithelial tumors	19
1.1. Benign epithelial tumors	20
1.1.1. Molluscum contagiosum.....	20
1.1.2. Molluscum pendulum.....	23
1.1.3. Seborrheic keratosis	24
1.2. Precancerous lesions	28
1.2.1. Actinic keratosis.....	28
1.2.2. Xeroderma pigmentosum.....	30
1.3. Malignant epithelial tumors.....	31
1.3.1. Keratoacanthoma	31
1.3.2. Epidermoid carcinoma <i>in situ</i>	33
1.3.3. Infiltrating epidermoid carcinoma.....	36
1.3.4. Undifferentiated epidermoid carcinoma	41
1.3.5. Basal cell carcinoma	44
1.3.5.1. Nodular.....	45
1.3.5.2. Ulcerated	54
1.3.5.3. Pigmented.....	59
1.3.5.4. Sclerodermiform	60
2. Sebaceous tumors	67
2.1. Benign sebaceous tumors	68
2.1.1. Chalazion.....	68
2.1.2. Sebaceous cyst	71
2.1.3. Cyst of Zeiss	73
2.1.4. Miliium	74
2.1.5. Sebaceous hyperplasia	75
2.2. Malignant sebaceous tumors	78
2.2.1. Sebaceous carcinoma	79

3. Adnexal tumors	85
3.1. Tumors of the hair follicle.....	86
3.1.1. Trichofolliculoma.....	87
3.1.2. Pilomatrixoma	89
3.1.3. Trichoblastoma.....	91
3.1.4. Trichoepithelioma.....	92
3.2. Tumors of the sweat gland.....	94
3.2.1. Eccrine hidrocystoma	94
3.2.2. Apocrine cystadenoma	98
3.2.3. Syringocystadenoma papilliferum.....	102
3.2.4. Syringoma	103
3.2.5. Desmoplastic syringoma.....	105
4. Melanic tumors	107
4.1. Ephelides.....	109
4.2. Nevus.....	110
4.2.1. Junctional	110
4.2.2. Compound	111
4.2.3. Dermal	112
4.2.4. Of Ota.....	114
4.2.5. Kissing nevus.....	115
4.3. Malignant lentigo	117
4.4. Extensive superficial melanoma	118
4.5. Nodular melanoma.....	119
5. Vascular tumors	121
5.1. Vascular tumors.....	122
5.1.1. Infantile hemangioma	123
5.1.2. Congenital hemangioma	126
5.1.3. Pyogenic granuloma.....	127
5.2. Vascular malformations	130
5.2.1. Capillary malformation	131
5.2.2. Lymphangioma	132
5.2.3. Venous malformation	134
5.2.4. Venous and arterial malformation	138
5.2.5. Arterial malformation	142
5.3. Arteriovenous fistula.....	143
5.3.1. Direct	143
5.3.2. Indirect.....	144

6. Fibro-muscular tumors.....	147
6.1. Lipoma.....	148
6.2. Keloid.....	150
6.3. Xanthelasma.....	151
6.4. Juvenile xanthogranuloma	157
6.5. Xanthogranulomatosis	159
6.6. Rhabdomyosarcoma.....	162
6.7. Kaposi’s sarcoma.....	163
6.8. Fibrosarcoma	165
7. Nerve tumors	167
7.1. Plexiform neuroma	168
7.2. Neurofibroma.....	169
7.3. Merkel cell carcinoma	171
8. Lymphoid tumors.....	175
8.1. B-cell lymphoma	177
8.2. T-cell lymphoma.....	184
9. Infectious diseases.....	187
9.1. Herpes	188
9.2. Chickenpox/shingles.....	189
9.3. Impetigo	191
9.4. Cellulitis	192
9.5. Abscess.....	193
10. Inflammatory diseases.....	197
10.1. Rosacea	198
10.2. Eczema	200
10.3. Atopic dermatitis.....	203
10.4. Psoriasis.....	204
10.5. Blepharochalasis syndrome	205
10.6. Seborrheic dermatitis.....	207
10.7. Ichthyosis.....	208
10.8. Vitiligo.....	209
10.9. Photoaging.....	210
10.10. Sarcoidosis	212
10.11. Dermatomyositis.....	214
10.12. IgG4 inflammation.....	215

SECTION 2

CONJUNCTIVAL TUMORS - CHRISTINE LEVY-GABRIEL²

1. Choristoma	219
1.1. Dermoid	221
1.2. Dermolipoma	222
2. Epithelial tumors	225
2.1. Papilloma	226
2.2. Conjunctival dysplasia and carcinoma <i>in situ</i>	229
2.3. Epidermoid carcinoma	237
3. Melanocytic tumors	241
3.1. Ethnic melanosis	242
3.2. Nevus	243
3.3. Precancerous Reese melanosis	246
3.4. Melanoma	249
4. Glandular tumors	257
4.1. Oncocytoma	259
4.2. Sebaceous adenoma	260
4.3. Sebaceous carcinoma	262
5. Lymphoproliferative tumors	265
5.1. Benign reactive lymphoid hyperplasia	266
5.2. Lymphoma	267
6. Vascular tumors	271
6.1. Pyogenic granuloma	272
6.2. Capillary angioma (child), cavernous angioma (venous)	273
6.3. Lymphangiectasia, lymphangioma	274
6.4. Kaposi's sarcoma	276
7. Stromal tumors	279
7.1. Fibrohistiocytic: juvenile xanthogranuloma, fibrous histiocytoma	280
7.2. Nerve: schwannoma	282

Molluscum contagiosum

Viral infection of the skin and palpebral mucosa.

Viral infections of the skin and palpebral mucosa exhibit a broad spectrum of clinical symptoms.

Some viruses such as the human papillomavirus (HPV) or the molluscum contagiosum virus (MCV) can colonize the epidermis in most individuals without causing any clinical lesions.

Some benign epithelial proliferations such as warts or mollusca can nevertheless develop in these individuals. Most of the time they are temporary and heal spontaneously without any treatment.

Discrete 2-mm skin-colored papule on the free margin with central umbilication.

Molluscum contagiosum is a viral infection limited to the skin, characterized by papules of normal skin color, occasionally umbilicated, occurring in children or young adults.

Molluscum contagiosum

Multiple lesions on the upper and lower palpebral free margins as well as a lesion below the lower lid.

There is no loss of lashes.

Molluscum contagiosum

Molluscum contagiosum of the free margin with a hyperkeratotic horn.
